CITYATTAK

Action Stations!

**The fate of millions
is in your hands ...**

**Only you can defeat
the impossible odds.**

You are the Defence Commander of a major city under attack by unknown hostile forces. Desperately you try to locate their position and destroy the enemy in the air and the squads of Urban Commandos trying to penetrate your ground defences.

Suddenly another menace appears — a roving, swirling ball of neutrons defended by a guided fireball. The only way to save your Command Centre and the city is to score a direct hit from above on its vulnerable centre point.

But watch the airborne attack. Every second they come closer to your Command Centre, every second brings the city closer to oblivion ...

LOADING INSTRUCTIONS

To load 'CITYATTAK' press 'SHIFT LOCK' then 'RUN STOP'. Press 'PLAY' on your tape and release 'SHIFT LOCK'. 'CITYATTAK' will now load. To play the game, wait until the tape has finished, then press the 'SPACE BAR'.

GAME PLAY

'CITYATTAK' is a machine code, joystick game, with fourteen levels to choose from.

Level O is reserved for practice only.

Use your joystick to select the required level, then press the 'FIRE' button to commence play. Be sure to use control port two for your joystick connection.

The attack force consists of an airborne invasion, a swirling neutron mass ground attack and squads of Urban Commandos.

The neutron mass will destroy your Command Centre and can only be knocked out with a direct hit from above. The earlier you hit and the more times, the greater your score will be. But take care to avoid the guided fireball.

The Urban Commandos may be destroyed by bombing from above, or by firing your laser gun sideways at head height.

After defeating each wave of invaders you must return to the Command Centre and await the next attack. But be warned – each time you win they grow stronger and stronger ...

Pressing the 'Q' key will quit the game and return you to the standby mode. Pressing the F7 key will freeze the game and give you a rest! The 'SPACE BAR' will restart where you left off.
